STAUFF products and services are globally available through wholly-owned subsidiaries and a tight network of authorised distributors and representatives in all major industrial regions of the world.

You can find detailed contact information on the last two pages of this product catalogue or at www.stauff.com/contact.

Please note: Unless otherwise stated, all data and figures in this product catalogue are approximate values and are only valid as references, which are not binding (also in respect to any third parties' rights of protection) and thus do not release the customer / user from checking and testing the suitability of the products for the foreseen purposes. Therefore, data and figures can only be used in a limited sense for construction purposes.

The application of the products is beyond the control possibilities of the manufacturer and, therefore, is exclusively subject to the responsibility of the customer / user.

In the event that a liability is nevertheless considered, any compensation will be limited to the value of the goods supplied by the manufacturer and used by the customer / user. As a matter of course, the manufacturer guarantees the perfect quality of all products in accordance with the General Terms and Conditions of Business and Sale.

Subject to modifications due to the ongoing development and improvement of the products.

With the publication of this product catalogue, previous editions are no longer valid.

For more than 50 years, the companies of STAUFF Group have been developing, manufacturing and distributing pipework equipment and hydraulic components for mechanical and plant engineering and for service and industrial maintenance.

In addition to mobile and industrial hydraulic machinery, Typical applications also include commercial and special purpose vehicles, rail transportation and energy technology. Likewise, STAUFF products are used in marine, oil and gas applications and in the process, food and chemical industries.

The overall range currently includes about 50000 standard products as well as numerous special and system solutions according to customer's specifications or based on our in-house development.

All STAUFF products undergo relevant testing in accordance with international regulations and are governed by the high standards of the in-house quality management system. Furthermore, many items have received certifications and approvals from various international institutes, organisations and authorities who have independently confirmed the quality and performance of the products.

Wholly-owned manufacturing, sales and service facilities in 18 countries and a tight global network of authorised distribution partners ensure high presence and service paired with a maximum of availability.

STAUFF LINE Components

With the seven dedicated **STAUFF Line** product groups

- **STAUFF Clamps**
- **STAUFF Connect**
- **STAUFF Flanges**
- **STAUFF Hose Connectors**
- **STAUFF Quick Release Couplings**
- **STAUFF Valves**
- **STAUFF Test**

from own, in-house development and manufacturing, the companies of the STAUFF Group provide a comprehensive range of components for fastening and connecting pipes, tubes and hoses for mobile and industrial hydraulic applications and many other industries.

The portfolio is completed by components for shutting-off, regulating, throttling and measuring fluid media.

In order to perfectly match each other, STAUFF Line products are designed and offered on a high, uniform level of quality. A large proportion of the range made from steel comes as standard with the premium STAUFF Zinc/Nickel surface coating, which is also optionally available for many of the other components.

This coating offers the most reliable surface protection far beyond the previous market standards – even after transport, handling and assembly of the components – and meets all current legal requirements.

If desired, Original Equipment Manufacturers can be supported with value-added services, from **technical consultation to pre-assembly, assembly and kitting** as well as **logistics services**:

- Support with the **selection of suitable standard components** and ordering options; provision of **customised solutions** according to customer's specifications or based on our in-house development – from protoTypeing to large scale production
- **Analysis and optimization** of existing and design and developments of new systems aimed at increasing the efficiency and performance of machines and equipment and creating value for customers by reducing the total cost
- **Pre-assembly, assembly and kitting** of individual components to customer-specific system modules
- Individually coordinated **procurement solutions** (e.g. web shop and electronic data interchange) and **supply models** (e.g. from warehousing of customised components to Kanban logistics and just-in-time delivery of pre-fabricated system modules to the assembly lines of the customers) aimed at optimising material flows

Aligned with the needs of the market, the product groups

- **STAUFF Test**
- **STAUFF Diagtronics**
- **STAUFF Filtration Technology**
- **STAUFF Hydraulic Accessories**

include a comprehensive range of analogue and digital measuring equipment and devices, filtration systems and replacement filter elements as well as accessories for the construction of tanks, reservoirs, power packs and gear boxes in mobile and industrial hydraulics.

The offer is completed by relevant value-added services:

- Support with the **selection of suitable components** and ordering options; provision of **customised solutions** according to customer's specifications or based on our in-house development – from protoTypeing to large scale production
- Analysis of existing hydraulic circuits aimed at filtration systems, tank components and monitoring devices that perfectly match to the specific requirements, and developing integrated concepts to increase the efficiency and performance of machines and equipment
- Individually coordinated **procurement solutions** and **supply models**

STAUFF Hydraulic Accessories

The consistently developed and enhanced STAUFF Hydraulic Accessories product range contains of well thought-out and sophisticated components suited to meet or exceed the increasing requirements of designing and building tanks, reservoirs, power packs and gear boxes for industrial and mobile hydraulic applications.

Whether you require visual or visual/electrical fluid level and temperature indicators, tank filler breathers in a variety of designs made of plastic or metal, or desiccant air breathers to protect your reservoir from contamination and moisture: STAUFF Hydraulic Accessories will provide you with the product you need.

The programme is completed by suction strainers and Diffusers that are positioned within the reservoir and connected directly to the suction and return lines.

For challenging applications, STAUFF is able to provide technically modified product versions, which, for example, convince with their outstanding resistance to external influences (such as high or low temperatures, aggressive media or UV exposure) or their compact and light-weight design.

STAUFF guarantees prompt service, even for customised solutions according to customer's specifications or based on our in-house development.

www.stauff.com/catalogues

The STAUFF online catalogue centre at www.stauff.com/catalogues provides fast and direct access to digital versions of this as well as other STAUFF product catalogues in all available languages.

Online Page-Flip Catalogues

- Easy navigation through index or the powerful full text search functionality
- Contents can be shared and forwarded by e-mail, printed or downloaded and saved in PDF file format
- Also suitable for mobile devices

Download Catalogues

- Download entire product catalogues and save them in PDF file format

Catalogue Request

- Contact form to request printed copies of the product catalogue as well as digital copies on USB stick

The fastest way to the online page-flip catalogue:

The links that can be found at the bottom edge of all pages of this product catalogue will lead you directly to the corresponding page in the online page-flip catalogue.

In doing so, contents can be searched, shared and forwarded by e-mail, printed or downloaded and saved in PDF file format.

Scan the QR code next to the direct link with the camera of your mobile device* and also use the functions in this way.

Catalogue 10 • Edition 06/2022

www.stauff.com/10/en/#10

www.stauff.com

With the STAUFF Digital Platform available at www.stauff.com, commercial customers and users of STAUFF products can not only inform themselves in all detail about the 50000 components typically available from stock, but also directly purchase these online without complex registration.

Main Functionalities of the STAUFF Digital Platform:

Around the clock

Check stock availability and pricing for STAUFF products in real time

Cross references

Search by article designations of other manufacturers / suppliers

Live chat

Get directly in touch with the STAUFF customer service and sales team

CAD database

Download 3D models and 2D drawings for STAUFF products

General information about the companies of STAUFF Group, latest business and product news as well as complete global contact details also be available.

Advantages as a Registered User of the STAUFF Digital Platform:

Purchase STAUFF products

Taking customer-specific pricing and delivery conditions into account

Ordering w/o searching

Quick ordering by entering article number, quantity and requested delivery date

File upload

Direct upload of orders with multiple positions in CSV or Excel file format

Notepad function

Create project lists to save interesting products for later

www.stauff.com/cad

Immediate access to and free download of 3D models and 2D drawings for a growing number of STAUFF products

www.filterinterchange.com

Online database for the quick and easy identification and interchange of almost all common brands and Types of replacement filter elements

SLTS

Level Gauge Type SNA

Design of Scale Plates Thermometer Options

Capillary Tube Thermometer
with a dual Celsius / Fahrenheit
scale up to +80 °C / +180 °F

Characteristics

Visual fluid level indication in hydraulic reservoirs with maximum tank pressures not exceeding 2 bar / 29 PSI

Nominal Sizes and Designs

- 7 nominal sizes from 76 mm / 2.99 in to 381 mm / 15.00 in
- Display either undivided (SNA-076 ... 176) or subdivided by strut(s) into 2 (SNA-254) or 3 sections (SNA-305 and SNA-381)

Please see page 15 for alternative nominal sizes and designs.

Media Compatibility

- Suitable for use with mineral and petroleum based hydraulic fluids (HL and HLP)

Materials

- Housing made of Steel St 12, black powder-coated
- Sight tube and plugs made of Polyamide (PA)
- Seals made of NBR (Buna-N®)
- Scale plate made of PVC

For the individual components of the level gauge (sight glass, housing, Seals, bolts), alternative materials for improved UV or chemical resistance, low-temperature applications down to -50 °C / -58 °F and use with special media (such as bio-degradable fluids, diesel oils, gasolines) are available on request.

Technical Data

- IP 65 protection rating: Dust tight and protected against water jets
- Operating temperature range:
-30 °C ... +80 °C / -22 °F ... +176 °F
- Recommended tightening torque: 8 N·m / 5.9 ft·lb

Accessories / Options

- Red / blue capillary tube thermometers with a temperature display range of up to +80 °C / +180 °F
- Dial thermometers with probe and a Celsius or a dual Celsius / Fahrenheit scale with a temperature display range of up to +100 °C / +200 °F
- Thermo Switches
- Temperature Sensors
- Floating Ball
- Deutsch Adaptor Cable

Please see pages 18 / 19 / 20 for details.

Dimensions

Maximum admissible tolerance for the bolt center spacing (dimension L2) according to DIN ISO 2768-f: ±0,20 mm / .008 in for all nominal sizes.

Nominal Size	Dimensions ^(mm/in)									
	A	B	C (Max.)	D	E	F (with T1)	F (with T2)	L1	L2	L3

Order Codes

① Type

Level Gauge with visual fluid level indication **SNA**

② Nominal Size

SNA-076 (nominal size of 76 mm / 2.99 in)	076
SNA-127 (nominal size of 127 mm / 5.00 in)	127
SNA-150 (nominal size of 150 mm / 5.91 in)	150
SNA-176 (nominal size of 176 mm / 6.93 in)	176
SNA-254 (nominal size of 254 mm / 10.00 in)	254
SNA-305 (nominal size of 305 mm / 12.00 in)	305
SNA-381 (nominal size of 381 mm / 15.00 in)	381

Please see page 15 for alternative nominal sizes.

③ Sealing Material

NBR (Buna-N®) (standard option)	B
FKM (Viton®)	V

④ Design of Scale Plate

With STAUFF logo (standard option)	S
Neutral design without any logo	N
Custom-designed scale plate (please specify)	X

⑤ Thermometer Option

Supplied without thermometer (standard option)	O
Red Capillary Tube thermometer on scale plate	T
Blue Capillary Tube thermometer on scale plate	TB
Dial thermometer with probe (200 mm / 7.87 in) and a Celsius scale up to 100 °C	T1C
Dial thermometer with probe (300 mm / 11.81 in) and a Celsius scale up to 100 °C	T2C
Dial thermometer with probe (200 mm / 7.87 in) and a dual scale up to 100 °C / 200 °F	T1CF
Dial thermometer with probe (300 mm / 11.81 in) and a dual scale up to 100 °C / 200 °F	T2CF

⑥ Banjo Bolt Size

Metric ISO thread M12 (standard option)	12
Metric ISO thread M10	10
Unified coarse thread 1/2–13 UNC	U1
Unified fine thread 1/2–20 UNF	U2
Unified extra-fine thread 1/2–28 UNEF	U3

⑦ Thermo Switch / Temperature Sensor / Anti-Drain Valve Option

Supplied without Thermo Switch / Temperature Sensor / Anti-Drain Valve	-
Thermo Switch TS-SNA/SNK; Break contact (normally closed); Equipped with standard connector	O
Thermo Switch TS-SNA/SNK; Break contact (normally closed); Equipped with connector M12	OD
Thermo Switch TS-SNA/SNK; Make contact (normally open); Equipped with standard connector	C
Thermo Switch TS-SNA/SNK; Make contact (normally open); Equipped with connector M12	CD
Temperature Sensor TS-SNA/SNK-PT100; Equipped with connector M12	PT100
Anti-Drain Valve Set A	DA
Anti-Drain Valve Set B	DB
Thermo Switches / Temperature Sensors only available for banjo bolt size M12. Please see pages 18 to 20 for details.	

⑧ Switching Temperature

Contact switches at +60 °C / +140 °F	60
Contact switches at +70 °C / +158 °F	70
Contact switches at +80 °C / +176 °F	80
Contact switches at +90 °C / +194 °F	90

Only to be indicated when using a Thermo Switch.

Options T1C/CF and T2C/CF are not available for banjo bolt size M10 and not be used in conjunction with Thermo Switches or Temperature Sensors. Please see page 18 for details.

Characteristics

Visual fluid level indication in hydraulic reservoirs with maximum tank pressures not exceeding 2 bar / 29 PSI; ideal for custom applications in terms of reservoir capacities and dimensions

Nominal Sizes

- Special sizes beyond the normal of 305 mm / 12 in up to a maximum nominal size of 950 mm / 37.4 in – even for small and medium quantities
- High-precision manufacturing within 1 mm tolerance to customer requirements

Design

- Robust design thanks to one or more struts that subdivide the display into 2 or more sections
- Positioning of the strut(s) based on engineering considerations and/or according to particular customer requirements
- Precise visual indication of the fluid level by use of scale plates (only available for nominal sizes smaller than 670 mm / 26.4 in) or by use of a coloured Floating Ball (recommended option for nominal sizes larger than 670 mm / 26.4 in)

- Plastic dampening clips to reduce vibration of the sight tube are used for nominal sizes larger than 450 mm / 17.7 in

Materials

Depending on the specific application, several different materials are available for the individual components of the level gauge (sight glass, housing, Seals, bolts); please see Inquiry Checklist for details.

STAUFF is always at your service if you need support in choosing the right materials or material combination for improved UV or chemical resistance or for low-temperature applications down to -50 °C / -58 °F and use with special media (such as bio-degradable fluids, diesel oils, gasolines).

Level Gauge (Special Options) Type SNA/SNK

Accessories / Options

- Red / blue capillary tube thermometers with a temperature display range of up to +80 °C / +180 °F
- Dial thermometers with probe and a Celsius or a dual Celsius / Fahrenheit scale with a temperature display range of up to +100 °C / +200 °F
- Thermo switches
- Temperature sensors
- Anti-Drain Valve
- Deutsch Adaptor Cable

Please see pages 18 / 19 / 20 for details.

Inquiry Checklist

In case that you require a special property or custom-designed level gauge, please use this checklist to provide us with details. If necessary, please also include further details, like the Type of fluid in use, its temperature and viscosity.

Nominal Size

Bolt centre distance (in mm)

Housing Material

☐ Aluminium ☐ Steel ☐ Stainless Steel

Housing Design

☐ Regular housing design with positioning of strut(s) based on engineering considerations

Please provide additional details / drawing for custom housing designs.

Banjo Bolt Size

☐ M12 ☐ M10 ☐ 1/2–13 UNC

☐ 1/2–20 UNF ☐ 1/2–28 UNEF

Banjo Bolt Material

☐ Steel ☐ Stainless Steel

Sealing Material

☐ NBR (Buna-N®) ☐ FKM (Viton®) ☐ EPDM

Alternative sealing materials to be defined separately.

Level Indication

☐ Scale plate (only for nominal sizes smaller than 670 mm / 26.4 in)

- ☐ Scale plate made of PVC
- ☐ Scale plate made of Aluminium
- ☐ With STAUFF logo
- ☐ Neutral design without any logo
- ☐ Custom-design (please specify)

- ☐ Without thermometer on scale plate
- ☐ Capillary tube thermometer with dual Celsius / Fahrenheit scale up to +80 °C / +180 °F

☐ Floating Ball (recommended option for nominal sizes larger than 670 mm / 26.4 in)

Other Types of level indication (magnetic floats, etc.) to be defined separately.

Options

☐ Dial thermometer with probe

- ☐ Celsius scale up to +100 °C
- ☐ Dual scale up to +100 °C / +200 °F
- ☐ Length of probe: 200 mm / 7.87 in
- ☐ Length of probe: 300 mm / 11.81 in

☐ Thermo Switch TS-SNA/SNK

- ☐ Break contact; Standard connector
- ☐ Break contact; Connector M12
- ☐ Make contact; Standard connector
- ☐ Make contact; Connector M12
- ☐ Contact switches at +60 °C / +140 °F
- ☐ Contact switches at +70 °C / +158 °F
- ☐ Contact switches at +80 °C / +176 °F
- ☐ Contact switches at +90 °C / +194 °F

☐ Temperature Sensor TS-SNA/SNK-PT100 ☐ Deutsch Adaptor Cable

☐ Anti-Drain Valve ☐ Set A ☐ Set B

Also available:

Level Gauges • Type SNK in Special Lengths

Visual / electrical fluid level indication in hydraulic reservoirs with level gauges up to a maximum nominal size of 950 mm / 37.4 in.

Please do not hesitate to contact STAUFF for further details.

Level Gauge Type SNK

Connection Details and Electrical Functions

Types C and O: Industrial standard connector (contact gap: 11 mm / .43in), similar to DIN EN 175301-803-B / ISO 6952

Types CD and OD: Five-pin circular connector M12, A-coded, according to IEC 61076-2-101

Characteristics

Visual / electrical fluid level indication in hydraulic reservoirs with maximum tank pressures not exceeding 2 bar / 29 PSI

Nominal Sizes and Designs

- 6 nominal sizes from 127 mm / 5.00 in to 381 mm / 15.00 in
- Display either undivided (SNK-127 ... 176) or subdivided by strut(s) into 2 (SNK-254) or 3 sections (SNK-305 and SNK-381)

Media Compatibility

- Suitable for use with mineral and petroleum based hydraulic fluids (HL and HLP)

Materials

- Housing made of Aluminium, black powder-coated
- Sight tube and plugs made of Polyamide (PA)
- Float made of Polyamide (PA)
- Seals made of FKM (Viton®)

For the individual components of the level gauge (sight glass, housing, Seals, bolts), alternative materials for improved UV or chemical resistance, low-temperature applications down to -50 °C / -58 °F and use with special media (such as bio-degradable fluids, diesel oils, gasolines) are available on request.

Electrical Specifications

- Magnetic float activates switch when fluid level drops below contact level within 60 mm / 2.36 in of lower banjo bolt
- Available as a break contact (normally closed) or make contact (normally open)
- Either equipped with industrial standard connector (Types C / O) or five-pin circular connector M12 (Types CD / OD)
- Direction of the electrical contact box (right / left) can be chosen when assembling the electrical contacts (Types C / D) or is right by default (Types CD / OD)
- Contact ratings: max. 10W (Types C / CD) or 5W (Types O / OD)
- Switching voltage: max. 50VAC/DC
- Switching current: max. 0,25 A

Technical Data

- IP 65 protection rating: Dust tight and protected against water jets (IP 67 on request)
- Operating temperature range: -30 °C ... +80 °C / -22 °F ... +176 °F
- Recommended tightening torque: 8 N·m / 5.9 ft·lb
- Minimum lateral distance to other magnetic components and cables: 10 mm / .39 in

Accessories / Options

- Dial thermometers with probe and a Celsius or a dual Celsius / Fahrenheit scale with a temperature display range of up to +100 °C / +200 °F
 - Thermo Switches
 - Temperature Sensors
 - Deutsch Adaptor Cable
- Please see pages 18 / 19 / 20 for details.

Dimensional drawings: All dimensions in mm (in).

Dimensions

Table shows dimension L1 for the version with industrial standard connector (Types C and O) only. Maximum admissible tolerance for the bolt center spacing (dimension L2) according to DIN ISO 2768-f: ±0,20 mm / .008 in for all nominal sizes.

④ Electrical Function

Break contact, opens at contact level (normally closed); Equipped with standard connector **O**
 Break contact, opens at contact level (normally closed); Equipped with connector M12 **OD**
 Make contact, closes at contact level (normally open); Equipped with standard connector **C**
 Make contact, closes at contact level (normally open); Equipped with connector M12 **CD**

⑤ Thermometer Option

Supplied without thermometer (standard option) **O**
 Dial thermometer with probe (200 mm / 7.87 in) and a Celsius scale up to 100 °C **T1C**
 Dial thermometer with probe (300 mm / 11.81 in) and a Celsius scale up to 100 °C **T2C**
 Dial thermometer with probe (200 mm / 7.87 in) and a dual scale up to 100 °C / 200 °F **T1CF**
 Dial thermometer with probe (300 mm / 11.81 in) and a dual scale up to 100 °C / 200 °F **T2CF**

⑥ Banjo Bolt Size

Metric ISO thread M12 (standard option) **12**
 Metric ISO thread M10 **10**
 Unified coarse thread 1/2-13 UNC **U1**
 Unified fine thread 1/2-20 UNF **U2**
 Unified extra-fine thread 1/2-28 UNEF **U3**

⑦ Thermo Switch / Temperature Sensor / Anti-Drain Valve Option

Supplied without Thermo Switch / Temperature Sensor / Anti-Drain Valve **-**
 Thermo Switch TS-SNA/SNK; Break contact (normally closed); Equipped with standard connector **O**
 Thermo Switch TS-SNA/SNK; Break contact (normally closed); Equipped with connector M12 **OD**
 Thermo Switch TS-SNA/SNK; Make contact (normally open); Equipped with standard connector **C**
 Thermo Switch TS-SNA/SNK; Make contact (normally open); Equipped with connector M12 **CD**
 Temperature Sensor TS-SNA/SNK-PT100; Equipped with connector M12 **PT100**
 Anti-Drain Valve Set A **DA**
 Anti-Drain Valve Set B **DB**
 Thermo Switches / Temperature Sensors only available for banjo bolt size M12. Please see pages 18 to 20 for details.

⑧ Switching Temperature

Contact switches at +60 °C / +140 °F **60**
 Contact switches at +70 °C / +158 °F **70**
 Contact switches at +80 °C / +176 °F **80**
 Contact switches at +90 °C / +194 °F **90**
 Only to be indicated when using a Thermo Switch.

Options T1C/CF and T2C/CF are not available for banjo bolt size M10 and not to be used in conjunction with Thermo Switches or Temperature Sensors. Please see page 18 for details.

Connection Details and Electrical Functions

Type DD: Five-pin circular connector M12, A-coded, according to IEC 61076-2-101

Level Gauge (Compact Design) Type SNKK

Dimensions

Maximum admissible tolerance for the bolt center spacing (dimension L2) according to DIN ISO 2768-f: ±0.20mm / .008in for all nominal sizes.

Nominal Size	Dimensions (mm/in)										
	A	B1	B2	C (Max.)	D	E	F (with T1)	F (with T2)	L1	L2	L3
SNKK-127	56	34,5	~55	8	35,1	51,5	157,5	257,5	165	127	~60
	2.20	1.36	~2.17	.32	1.26	2.03	6.20	10.14	6.50	5.00	~2.36
SNKK-150	56	34,5	~50	8	35,1	51,5	157,5	257,5	188	150	~60

Order Codes

① Type

Level Gauge with visual / electrical fluid level indication (compact design) **SNKK**

② Nominal Size

SNKK-127 (nominal size of 127 mm / 5.00 in) **127**
 SNKK-150 (nominal size of 150 mm / 5.91 in) **150**
 SNKK-176 (nominal size of 176 mm / 6.93 in) **176**
 SNKK-254 (nominal size of 254 mm / 10.00 in) **254**
 SNKK-305 (nominal size of 305 mm / 12.00 in) **305**
 SNKK-381 (nominal size of 381 mm / 15.00 in) **381**
 Contact STAUFF for alternative nominal sizes and designs.

③ Sealing Material

FKM (Viton®) **V**

④ Electrical Function

SPDT (Single Pole Double Throw) contacts, 1 contact opens and 1 contact closes at contact level; Equipped with connector M12 **DD**

⑤ Thermometer Option

Supplied without thermometer (standard option) **O**
 Dial thermometer with probe (200 mm / 7.87 in) and a Celsius scale up to 100 °C **T1C**
 Dial thermometer with probe (300 mm / 11.81 in) and a Celsius scale up to 100 °C **T2C**
 Dial thermometer with probe (200 mm / 7.87 in) and a dual scale up to 100 °C / 200 °F **T1CF**
 Dial thermometer with probe (300 mm / 11.81 in) and a dual scale up to 100 °C / 200 °F **T2CF**

⑥ Banjo Bolt Size

Metric ISO thread M12 (standard option) **12**
 Metric ISO thread M10 **10**
 Unified coarse thread 1/2–13 UNC **U1**
 Unified fine thread 1/2–20 UNF **U2**
 Unified extra-fine thread 1/2–28 UNEF **U3**

⑦ Thermo Switch / Temperature Sensor / Anti-Drain Valve Option

Supplied without Thermo Switch / Temperature Sensor / Anti-Drain Valve **-**
 Break Contact, opens at contact level (normally closed); Equipped with standard connector **O**
 Break Contact, opens at contact level (normally closed); Equipped with connector M12 **OD**
 Make Contact, closes at contact level (normally open); Equipped with standard connector **C**
 Make Contact, closes at contact level (normally open); Equipped with connector M12 **CD**
 Temperature Sensor TS-SNA/SNK-PT100; Equipped with connector M12 **PT100**
 Anti-Drain Valve Set A **DA**
 Anti-Drain Valve Set B **DB**
 Thermo Switches / Temperature Sensors only available for banjo bolt size M12. Please see pages 18 to 20 for details.

⑧ Switching Temperature

Contact switches at +60 °C / +140 °F **60**
 Contact switches at +70 °C / +158 °F **70**
 Contact switches at +80 °C / +176 °F **80**
 Contact switches at +90 °C / +194 °F **90**
 Only to be indicated when using a Thermo Switch.

Options T1C/CF and T2C/CF are not available for banjo bolt size M10 and not be used in conjunction with Thermo Switches or Temperature Sensors. Please see page 18 for details.

Characteristics

Visual / electrical fluid level indication in hydraulic reservoirs with maximum tank pressures not exceeding 2 bar / 29 PSI; ideal for applications in which space is limited

Nominal Sizes and Designs

- 6 nominal sizes from 127 mm / 5.00 in to 381 mm / 15.00 in
- Compact design allows space-saving installation: Always 40 mm / 1.57 in shorter than Level Gauges SNK of the comparable nominal size
- Display either undivided (SNKK-127 ... 176) or subdivided by strut(s) into 2 (SNKK-254) or 3 sections (SNKK-305 and SNKK-381)

Media Compatibility

- Suitable for use with Mineral and Petroleum based hydraulic fluids (HL and HLP)

Materials

- Housing made of Aluminium, black powder-coated
- Sight tube and plugs made of Polyamide (PA)
- Float made of Polypropylene (PP)
- Seals made of FKM (Viton®)

For the individual components of the level gauge (sight glass, housing, Seals, bolts), alternative materials for improved UV or chemical resistance, low-temperature applications down to -50 °C / -58 °F and use with special media (such as bio-degradable fluids, diesel oils, gasolines) are available on request.

Electrical Specifications

- Magnetic float activates switch when fluid level drops below contact level within 60 mm / 2.36 in of lower banjo bolt
- Available as a SPDT (Single Pole Double Throw) contact
- Equipped with five-pin circular connector M12 or Deutsch connector
- Direction of the electrical contact box is right to top by default

Technical Data

- IP 67 protection rating: Dust tight and protected against powerful water jets; even immersion (up to 1 m / 3.28 ft) in water is possible under defined conditions of pressure and time (IP 69K on request)
- Operating temperature range: -30 °C ... +80 °C / -22 °F ... +176 °F
- Recommended tightening torque: 8 N·m / 5.9 ft·lb
- Minimum lateral distance to other magnetic components and cables: 10 mm / .39 in

Accessories / Options

- Dial thermometers with probe and a Celsius or a dual Celsius / Fahrenheit scale with a temperature display range of up to +100 °C / +200 °F
 - Thermo Switches
 - Temperature Sensors
 - Deutsch Adaptor Cable
- Please see pages 18 / 19 / 20 for details.

Thermo Switch Type TS

Connection Details and Electrical Functions

Types C and O: Industrial standard connector (contact gap: 9,4 mm / .37 in), similar to DIN EN 175301-803-C / ISO 6952

Types CD and OD: Five-pin circular connector M12, A-coded, according to IEC 61076-2-101

Characteristics

Fluid temperature measurement in conjunction with STAUFF Level Gauges SNA, SNK and SNKK

Installation

- Replaces the lower banjo bolt of the Level Gauge
- Available for bolt size M12 only
- Clearance hole: Ø13 mm / Ø.51 in

Materials

- Metal parts made of Stainless Steel (1.4305)
- Plastic parts made of glass-fibre reinforced Polyamide (PA)

Electrical Specifications (General)

- Thermo switch is activated when the fluid temperature reaches the respective switching temperature
- Available with switching temperatures of +60 °C / +140 °F, +70 °C / +158 °F, +80 °C / +176 °F or +90 °C / +194 °F (with a switching tolerance of ±5 °C / ±9 °F and a hysteresis of 35 °C / 63 °F)
- Available as a break contact (normally closed) or make contact (normally open)
- Either equipped with industrial standard connector (Types C / O) or five-pin circular connector M12 (Types CD / OD)
- Thermo switch can be rotated by 360° to its final direction

Dimensions

	Dimensions (mm/in)	
	A	B
In conjunction with Level Gauge SNA	39 1.54	76 2.99
In conjunction with Level Gauge SNK	47 1.85	68 2.68
In conjunction with Level Gauge SNKK	47 1.85	68 2.68

Electrical Specifications (Alternating Current)

- Maximum voltage: 250 V, 2,5 (1,6) A, 50 Hz
- Maximum current at 2000 operations: 4,0 A at $\cos \varphi = 0,45$ / 250 V, 135 °C
- Maximum current at 10000 operations: 2,5 A at $\cos \varphi = 1,00$ / 250 V, 150 °C
- Minimum current: 20 mA

Electrical Specifications (Direct Current)

- Maximum voltage: 42 V

Accessories / Options

- Deutsch Adaptor Cable
- Please see page 20 for details.

Order Codes

TS-SNA/SNK - O - 60

Contact switches at +90 °C / +194 °F	90

Dial Thermometer with Probe Types T1/T2

Characteristics

Visual fluid temperature measurement in conjunction with STAUFF Level Gauges SNA, SNK and SNKK

Nominal Sizes and Designs

- Probe lengths of 200 mm / 7.87 in or 300 mm / 11.81 in
- Scale diameter of 33 mm / 1.30 in

Please contact STAUFF for special versions.

Scale Options

- Celsius scale of 0 °C ... +100 °C
- Dual Celsius / Fahrenheit scale of up to +100 °C / +200 °F

Materials

- Probe made of Stainless Steel V4A (1.4571)

Technical Data

- IP 65 protection rating: Dust tight and protected against water jets

Installation

- Requires a special banjo bolt (with internal M8 port for the dial thermometer with probe) to replace the lower standard banjo bolt of the Level Gauge
- Use suitable wrench SW 13 (Hex .51) to fasten; turning on the body itself may damage the product

Please note that Dial Thermometers with Probe can only be ordered in conjunction with Level Gauges SNA, SNK and SNKK. Please see page 14 to 17 for details.

Dimensional drawings: All dimensions in mm (in).

Connection Details and Electrical Functions

Four-pin circular connector M12,

Technical Data

- Operating temperature range (for the connector area):
-25 °C ... +80 °C / -13 °F ... +176 °F
- IP 68 protection rating: Dust tight and protected against powerful water jets; even immersion (beyond 1 m / 3.28 ft) in water is possible under defined conditions of pressure and time

Accessories / Options

- Deutsch Adaptor Cable
- Please see page 20 for details.

Characteristics

Fluid temperature measurement in conjunction with STAUFF Level Gauges **SNA**, **SNK** and **SNKK**; Analysis of signals with required equipment, simply connect to your on board control unit or PLC.

Installation

- Replaces the lower banjo bolt of the Level Gauge
- Available for bolt size M12 only
- Clearance hole: Ø13 mm / Ø.51 in

Materials

- Metal parts (including all fluid-affected parts) made of Stainless Steel V2A (1.4305)

Electrical Specifications

- Measuring temperature range:
-40 °C ... +150 °C / -40 °F ... +302 °F
- Platinum measuring element PT100 according to DIN EN 60751, class A
- Accuracy: $\pm(0,15 \text{ K} + 0,002 \times |t|)$
- Max. contact current: 2,0 mA
- Equipped with four-pin circular connector M12 with gold-plated contacts
- Power supply 20...32V DC

E

The direct installation set can also be used in conjunction with Thermo Switches TS (see page 18). Please contact STAUFF for further information.

Materials

- Fluid-affected parts made of Stainless Steel V2A (1.4305)
- M12 screw nut made of Steel, zinc-plated
- Front ring made of Stainless Steel V2A (1.4305)
- O-ring and gasket made of NBR (Buna-N®) (standard option), FKM (Viton®) or EPDM

Please see top of this page for Technical Details and Electrical Specifications for the Temperature Sensor.

Accessories / Options

- Deutsch Adaptor Cable
- Please see page 20 for details.

Temperature Sensor with Direct Installation Set Type TS-SNA/SNK-PT100-T

Characteristics

Direct fluid temperature measurement without STAUFF Level Gauges **SNA**, **SNK** and **SNKK**; Analysis of signals with required equipment, simply connect to your on board control unit or PLC.

Installation

- Direct installation to the outer wall of the hydraulic reservoir or gearbox
- Compact design and easy installation
- Clearance hole: Ø13 mm / Ø.51 in

Anti-Drain Valve Type SDV-SNA/SNK

A

Characteristics

Anti-drain valve to be used in conjunction with banjo bolts of level gauges, allowing these to be removed and replaced quickly and easily without spillage of fluid from the hydraulic reservoir

Features

- Used in conjunction with either the lower or both the lower and the upper banjo bolts of the Level Gauge
- Distance adaptor for the upper banjo bolt available when the check valve is used with the lower banjo bolt only
- Available for bolt size M12 only

Materials

- Housing made of Stainless Steel V2A (1.4301)
- Hexagon head nuts made of Steel, zinc/nickel-plated (Fe/Zn Ni 6)
- Seals made of NBR (Buna-N®)

Contact STAUFF for alternative materials.

Deutsch Adaptor Cable Type DT04-4P

Characteristics

Deutsch adaptor to use for adaption from M12 to Deutsch Plug DT04-4P.

Installation

- Adapts to cable box M12 of SNK
- Adapts to M12 connector of SNKK and TS-SNA/SNK ...
- Adapts to M12 connector of TS-SNA/SNK-PT100
- Adapts to any electrical M12 connector in other Stauff series

Technical Data

- IP 68 protection rating: Dust tight and protected against powerful water jets
- Length: 100mm (3.93 in)
- Operating temperature range: -30°C ... +80°C / -22°F ... +176°F

1 NPT **N16**
Note: Others on request

⑦ Voltage (Volt AC/DC)

48 Volt max. (standard option) **G048**
115 Volt max. (for thread N16 only) **G115**

⑧ Electrical Connection

similar DIN VDE 0627 / IEC 61984 **CB**
M12 pin terminal **M12**

Characteristics

The STAUFF Level-Temperature Switches (SLTS Series) are unique in their design and modularity. One of the greatest advantages is the ability of the end-user to adjust the switching level. The internal support wire carrying the level and temperature switches makes it a simple and quick job to change the level switch position.

Level contact positions (L, H) are set as given in the order code. They can be adjusted individually later on.

Please consider a minimum distance of 40 mm / 1.57 in between the switching points.

Features

- Suitable for Mineral Oil and HFC fluids, other fluids on request
- Either 1 or 2 level contacts available
- 1 integrated temperature switch (optional)
- Standard electrical function:
 - Level contacts: Normally closed, opens with falling level
 - Temperature contacts: Normally closed, opens with rising temperature

STAUFF Level-Temperature Switches SLTS are available with other electrical functions on request.

Contact Life Time

Due to their design Reed contacts have a very high life expectancy. However, it is worthwhile to note the following information.

Contact Protection

To reduce the high reverse voltage produced when a reed switch opens, the following contact protection can be applied.

- DC voltage: a diode parallel to the load, see figure A
- AC voltage: a RC-network parallel to the load, see figure B and table below

Open contact voltage V	10 VA		25 VA		50 VA		75 VA		100 VA	
	R (Ω)	C (μF)	R (Ω)	C (μF)	R (Ω)	C (μF)	R (Ω)	C (μF)	R (Ω)	C (μF)
24	22	0,022	1	0,1	1	0,47	1	1	1	1
48	120	0,0047	22	0,022	1	0,1	1	0,47	1	0,47
110	470	0,001	120	0,0047	22	22	22	0,047	22	0,1

Options

- 1 NPT and others available on request
 - max. 115 Volt switching (for thread N16 only)
 - Deutsch Adaptor Cable
- Please see page 20 for details.

Materials

- Stem: Brass
- Float/Sealing: NBR (Buna-N®)

- Max. operating temp.: +80 °C / +176 °F

Electrical Data and Output

- Max. current level contact: 0.5 A
- Max. current temp. contact: 2.0 A
- Contact load level contact: 10 VA
- Max. operating voltage: (See ordering code)

- Specific gravity of fluid: $\geq 0,8 \text{ kg/dm}^3$
- Hysteresis: +18 °C / +64.4 °F

Protection Rating

- IP 65 protection rating: Dust tight and protected against water jets

SPB-3

Characteristics

Designed to be used as filler ports for hydraulic reservoirs, allowing the reservoir to breathe whilst protecting it from contamination found in harsh environments

Features

- Available with 3 different cap diameters
- Threaded version, equipped with male BSP thread (ISO 228) or male NPT thread (ANSI B1.20.1)
- Operating temperature range:
-40 °C ... +120 °C / -40 °F ... +248 °F

Materials

- Made of non-corrosive materials
- Body and cap made of glass-fibre reinforced Polyamide (PA)
- Seals made of NBR (Buna-N®)

Contact STAUFF for alternative materials.

Accessories / Options

- Pressurisation up to 0,7 bar / 10 PSI (not available for SPB-1)
- Air filter element
- Anti-splash feature
- Plastic dipstick with integrated anti-splash feature
- Plastic dipstick with integrated magnet
- Oil Demister (not available for SPB-1)

Please see pages 26 and 53 for details.

Maximum Air Flow Rate

- 0,15 m³/min / 5.30 cfm for SPB-1
- 0,40 m³/min / 14.13 cfm for SPB-2
- 1,00 m³/min / 35.31 cfm for SPB-3

Please see page 27 for detailed air flow curves.

Installation

- Recommended mounting spaces:
Ø48 mm / Ø1.89 in for SPB-1,
Ø90 mm / Ø3.54 in for SPB-2, and
Ø122 mm / Ø4.80 in for SPB-3

● Standard Option

Order Codes

SPB	-	2	-	O	-	10	-	B12	-	O	-	D200
①		②		③		④		⑤		⑥		⑦

① Type

Plastic Filler Breather **SPB**

② Version

Threaded version; Cap diameter Ø45 mm (Ø1.77 in)	1
Threaded version; Cap diameter Ø70 mm (Ø2.76 in)	2
Threaded version; Cap diameter Ø101 mm (Ø3.98 in)	3

③ Pressurisation

Without pressurisation (standard option)	0
Pressurised at 0,2 bar / 3 PSI	B0.2
Pressurised at 0,35 bar / 5 PSI	B0.35
Pressurised at 0,7 bar / 10 PSI	B0.7

Type SPB-1 is only available without pressurisation.
Please see page 26 for details.

④ Air Filter Element (Material / Micron Rating)

10 µm Foam / PUR (standard option)	10
40 µm Foam / PUR	40
3 µm Inorganic Glass-Fibre, pleated	E03
10 µm Filter Paper, pleated	L10

Options E03 and L10 are only available for Type SPB-3.
Contact STAUFF for alternative materials / micron ratings.

⑤ Connection Thread (Male)

G1/4 (for SPB-1 only)	B04
G3/8 (for SPB-1 and 2 only)	B06
G1/2 (for SPB-1, 2 and 3)	B08
G3/4 (for SPB-2 and 3 only)	B12
G1 (for SPB-3 only)	B16
1/4 NPT (for SPB-1 only)	N04
3/8 NPT (for SPB-1 only)	N06
1/2 NPT (for SPB-1 only)	N08
3/4 NPT (for SPB-1, 2 and 3)	N12
1 NPT (for SPB-3 only)	N16

⑥ Anti-Splash Feature

With anti-splash feature (standard option)	A
Without anti-splash feature	0

The anti-splash feature for the SPB-1, can only be achieved in conjunction with a dipstick, but is not available for the SPB-1 with connection sizes B04 and N04. Please see page 26 for details.

⑦ Dipstick

Plastic dipstick (200 mm / 7.88 in) with integrated anti-splash feature	D200
Plastic dipstick (300 mm / 11.81 in) with integrated anti-splash feature	D300
Plastic dipstick (300 mm / 11.81 in) with integrated magnet	D300M
Without dipstick	-

A shorter dipstick length can be achieved by simply cutting down the total length according to individual requirements. Please see page 26 for details.

Dimensional drawings: All dimensions in mm (in).

Plastic Filler Breather Types SPB-4 / 5 (Flange Version)

B

Clamping jaw installation
to a single mounting hole

Installation to a six-hole bolt pattern
with flange interface similar to DIN 24557, Part 2

Characteristics

Designed to be used as filler ports for hydraulic reservoirs, allowing the reservoir to breathe whilst protecting it from contamination found in harsh environments

Features

- Cap diameter of Ø101 mm / Ø3.98 in
- Either for clamping installation (with 3 clamping jaws and cross-drive screws) or with a six-hole bolt pattern
- Operating temperature range: -40 °C ... +120 °C / -40 °F ... +248 °F

Materials

- Made of non-corrosive materials
- Body and cap made of glass-fibre reinforced Polyamide (PA)
- Seals made of NBR (Buna-N®)

Contact STAUFF for alternative materials.

Accessories / Options

- Plastic basket (800 µm)
- Pressurisation up to 0,7 bar / 10 PSI
- Air filter element
- Anti-splash feature
- Plastic dipstick with integrated anti-splash feature
- Plastic dipstick with integrated magnet

Please see page 26 for details.

Maximum Air Flow Rate

- 1,00 m³/min / 35.31 cfm for SPB-4 / 5

Please see page 27 for detailed air flow curves.

Installation

- Recommended mounting space: Ø122 mm / Ø4.80 in
- Six-hole bolt pattern for flange interfaces similar to DIN 24557, part 2 (Type SPB-5):

- 6 sheet metal screws (ISO 7049-St 4.8 x 16-C-H) are included in delivery (Type SPB-5); can be replaced by regular M5 socket cap screws (ISO 4762), if required
- Recommended diameters of the screw holes, depending on the sheet thickness of the reservoir (Type SPB-5):
Ø4,0 mm / Ø.16 in at a thickness of 1,20 mm / .05 in,
Ø4,1 mm / Ø.16 in at a thickness of 2,00 mm / .08 in,
Ø4,3 mm / Ø.17 in at a thickness of 4,00 mm / .16 in, and
Ø4,4 mm / Ø.17 in at a thickness of 5,00 mm / .20 in

Order Codes

① Type

Plastic Filler Breather **SPB**

② Version

Bayonet version for clamping jaw installation to a single mounting hole; Cap diameter Ø101 mm (Ø3.98 in) **4**
Bayonet Version with six-hole bolt pattern for flange interfaces similar to DIN 24557, part 2; Cap diameter Ø101 mm (Ø3.98 in) **5**

③ Pressurisation

Without pressurisation (standard option) **0**
Pressurised at 0,2 bar / 3 PSI **B0.2**
Pressurised at 0,35 bar / 5 PSI **B0.35**
Pressurised at 0,7 bar / 10 PSI **B0.7**

Please see page 26 for details.

④ Air Filter Element (Material / Micron Rating)

10 µm Foam / PUR (standard option) **10**
40 µm Foam / PUR **40**
3 µm Inorganic Glass-Fibre, pleated **E03**
10 µm Filter Paper, pleated **L10**

Contact STAUFF for alternative materials / micron ratings.

⑤ Basket Option

Plastic basket (105 mm / 4.13 in) **S080**
Telescopic plastic basket **S200**
(max. 205 mm / max. 8.07 in)
Plastic basket with flange interface similar to DIN 24557, part 2 **S095P**
(95 mm / 3.74 in)
Without basket **X**

Option S095P is only available for Type SPB-5.
Please see page 26 for details.

⑥ Anti-Splash Feature

With anti-splash feature (standard option) **A**
Without anti-splash feature **0**

⑦ Dipstick

Plastic dipstick (200 mm / 7.88 in) with integrated anti-splash feature **D200**
Plastic dipstick (300 mm / 11.81 in) with integrated anti-splash feature **D300**
Plastic dipstick (300 mm / 11.81 in) with integrated magnet **D300M**
Without dipstick **-**

A shorter dipstick length can be achieved by simply cutting down the total length according to individual requirements. When choosing a combination of a basket and a dipstick, the dipstick has to be at least 15 mm / .59 in shorter than the basket.
Please see page 26 for details.

Plastic Dipstick Types DS-1 / 2 / 3 Anti-Splash Feature

B

For all Plastic Filler Breathers (except Type SPB-1 with connection sizes B04 and N04), dipsticks made of Polyamide are available as an option. These dipsticks are available in 2 standard lengths of 200 mm / 7.87 in and 300 mm / 11.81 in and equipped with 2 adjustable level indicators in green and red colour.

A shorter dipstick length can be achieved by simply cutting down the total length according to individual requirements. The markings at 25.4 mm / 1.00 in to assist simply cutting.

All dipsticks have an integrated anti-splash feature protecting the SPB from backspilling fluid and avoiding an early breakdown of the air filter element.

Optionally a powerful magnet collects metal particles from the oil and gives extra safety for your application.

Please note: When choosing a combination of a dipstick and a basket (see below), the dipstick has to be at least 15 mm / .59 in shorter than the basket.

Connection	Code	For Type	Suitable Dipstick*	ØD (mm/in)
Male BSP Thread (ISO 228)	G1/4 B04	SPB-1	Dipstick Option Not Available	
	G3/8 B06	SPB-1/2	DS-1	10 / .39
	G1/2 B08	SPB-1/2/3 SPBM	DS-2	14 / .55

	S095-P	SPB-5	DS-3	18 / .71
	S200	SPB-4/5	DS-3	18 / .71
w/o Basket	X	SPB-4/5	DS-3	18 / .71
		SMBB-80	DS-1	10 / .39

* When ordered separately, please add the length of the dipstick (in mm) to the ordering code (e.g. DS-2-300).

Special designs and alternative materials available on request. Please contact STAUFF for further details.

Plastic Basket ▪ Types S080 / S095-P / S200

For the Plastic Filler Breathers SPB-4 and SPB-5, different Types of baskets are available as an option. All baskets have a reinforced 0,8 x 3,5 mm / .03 x .14 in mesh (800 µm), so that rough dirt particles are filtered out of the medium and a smooth flow into the tank is being ensured.

The **Plastic Basket S080** (length of 105 mm / 4.13 in) snaps into the breather housing and suitable for the SPB-4 and SPB-5.

The **Plastic Basket S095-P** (length of 95 mm / 3.74 in) is equipped with a six-hole bolt pattern with flange interface similar to DIN 24557, part 2. It is suitable for the SPB-5 / SMBB-80 only and is installed between the breather housing and the reservoir.

The **Telescopic Plastic Basket S200** (maximum length of 205 mm / 8.07 in) is ideal to further improve the straining ability and oil flow-through and allowing longer dipstick lengths, where reservoir depth allows. It also snaps into the breather housing and is suitable for the SPB-4 and SPB-5.

Please note: When choosing a combination of a dipstick (see above) and a basket, the dipstick has to be at least 15 mm / .59 in shorter than the basket.

Special designs and alternative materials available on request. Please contact STAUFF for further details.

Plastic Basket S080 (for SPB-4/5)
Material: Polypropylene (PP)

Plastic Basket S095-P (only for SPB-5 / SMBB-80)
Material: Polyamide (PA)

Six-hole bolt pattern with flange interface according to DIN 24557, part 2

Telescopic Plastic Basket S200 (for SPB-4/5)
Material: Polypropylene (PP)

Pressurisation

Many tank filler breathers of the SPB, SMBB and SMBT series are also available as pressurised versions. Information on the specific valve and pressurization settings that are available by default can be found on the corresponding catalogue pages.

When the fluid level inside the reservoir rises, no air is expelled from the reservoir until the pressurisation level is reached. With decreasing fluid level inside the reservoir, the tank pressure drops and it is ensured that air is drawn into the reservoir.

Due to less breathing, the service life of a filler breather and the oil can be increased by using the pressurisation feature. It also minimizes foaming and cavitation, and provides additional protection from moisture entering the reservoir which causes erosion and oil degradation.

Further Accessories / Options

Weld Riser ▪ Type WR
Suitable for SPB-5
(See page 39 for details)

Side Mount Bracket (Polyamide) ▪ Type ASMB-1
Suitable for SPB-5
(See page 38 for details)

Plastic Filler Breather Type SPBN (Compact Design; Threaded or Bayonet Version)

B

Characteristics

Designed to be used as filler ports for hydraulic reservoirs, allowing the reservoir to breathe whilst protecting it from contamination found in harsh environments; ideal for applications in which space is limited

Features

- Cap diameter of Ø70 mm / Ø2.76 in
- Threaded version, equipped with male BSP thread (ISO 228) or male NPT thread (ANSI B1.20.1)
- Bayonet version for flange interfaces, with a six-hole bolt pattern, similar to DIN 24557, part 2
- Operating temperature range:
-40 °C ... +120 °C / -40 °F ... +248 °F

Materials

- Body and cap made of glass-fibre reinforced Polyamide (PA)
- Socket made of Steel, zinc-plated
- Bayonet flange made of Steel, zinc-plated
- Basket made of Steel, zinc-plated or Polyamide (PA)
- Seals made of NBR (Buna-N®)

Contact STAUFF for alternative materials.

Accessories / Options

- Mounting set including bayonet flange, steel or plastic basket (800 µm), gaskets and bolts
- Pressurisation up to 0,7 bar / 10 PSI
- Air filter element
- Anti-splash feature (for Threaded version only)
- Plastic dipstick with integrated anti-splash feature
- Plastic dipstick with integrated magnet
- Oil Demister

Please see pages 29 and 53 for details.

Maximum Air Flow Rate

- 0,40 m³/min / 14.13 cfm

Please see page 29 for detailed air flow curves.

Installation

- Six-hole bolt pattern for flange interfaces similar to DIN 24557, part 2 (bayonet version with mounting set):

- 6 slotted pan head screws (ISO 1580 M5 x 12-5.8) are included in delivery of the bayonet version with mounting set

Dimensions (Threaded Version)

Please see page 29 for details.

⑦ Dipstick

Plastic dipstick (200 mm / 7.88 in) with integrated anti-splash feature **D200**
 Plastic dipstick (300 mm / 11.81 in) with integrated anti-splash feature **D300**
 Plastic dipstick (300 mm / 11.81 in) with integrated magnet **D300M**
 Without dipstick **-**

A shorter dipstick length can be achieved by simply cutting down the total length according to individual requirements. Please see page 26 for details.

Dimensional drawings: All dimensions in mm (in).

Plastic Dipstick Anti-Splash Feature

For all Plastic Filler Breathers SPBN, dipsticks made of Polyamide are available as an option. These dipsticks are available in 2 standard lengths of 200 mm / 7.87 in and 300 mm / 11.81 in and equipped with 2 adjustable level indicators in green and red colour. A shorter dipstick length can be achieved by simply cutting down the total length according to individual requirements.

All dipsticks have an integrated anti-splash feature protecting the SPBN from backspilling fluid and avoiding an early breakdown of the air filter element. For Plastic Filler Breathers without dipstick, the anti-splash function can be achieved by an integrated concave baffle.

Please note: When choosing a combination of a dipstick and a basket, the dipstick has to be at least 15 mm / .59 in shorter than the basket.

Special designs and alternative materials available on request.
Please contact STAUFF for further details.

Pressurisation

Many tank filler breathers of the SPB, SMBB and SMBT series are also available as pressurised versions. Information on the specific valve and pressurization settings that are available by default can be found on the corresponding catalogue pages.

When the fluid level inside the reservoir rises, no air is expelled from the reservoir until the pressurisation level is reached. With decreasing fluid level inside the reservoir, the tank pressure drops and it is ensured that air is drawn into the reservoir.

Due to less breathing, the service life of a filler breather and the oil can be increased by using the pressurisation feature. It also minimizes foaming and cavitation, and provides additional protection from moisture entering the reservoir which causes erosion and oil degradation.

Mounting Set for Baskets (including Bayonet Flange, Gaskets and Bolts)

Scope of Delivery / Order Codes

Mounting sets for baskets include the following components:

- 6 slotted pan head screws made of steel, zinc-plated (ISO 1580 M5 x 12-5.8)
- Bayonet flange made of steel, zinc-plated, with six-hole bolt pattern acc. to DIN 24557, part 2
- 2 gaskets made of NBR (Buna-N®) - one for underneath and one for on top of the basket
- Metal or plastic basket (only if required):

Metal basket (80 mm / 3.15 in):	S-080-M-F-SPBN-BS-B
Metal basket (100 mm / 3.94 in):	S-100-M-F-SPBN-BS-B
Metal basket (150 mm / 5.91 in):	S-150-M-F-SPBN-BS-B
Metal basket (200 mm / 7.87 in):	S-200-M-F-SPBN-BS-B
Plastic basket (95 mm / 3.74 in):	S-095-P-F-SPBN-BS-B
Without basket:	Adapter-SPBN-BM-B

Mounting sets can also be ordered as part of a complete breather assembly.
Please see page 28 for details.

Extended Bayonet Flange - Type EBF
Suitable for SPBN; Bayonet Version BM
(See page 39 for details)

Weld Riser - Type WR
Suitable for SPBN; Bayonet Version BM
(See page 39 for details)

Side Mount Bracket (Polyamide) - Type ASMB-1
Suitable for SPBN; Bayonet Version BM
(See page 38 for details)

Side Mount Bracket (Aluminium) - Type ASMB-2
Suitable for SPBN; Bayonet Version BM
(See page 38 for details)

1/4 NPT	N04
3/8 NPT	N06

Contact STAUFF for alternative threads.

Metal Filler Breather Type SMBB-47 (Bayonet Version)

Characteristics

Designed to be used as filler ports for hydraulic reservoirs, allowing the reservoir to breathe whilst protecting it from contamination found in harsh environments

Features

- Cap diameter of Ø47 mm / Ø1.85 in
- Bayonet version with a three-hole bolt pattern
- Operating temperature range: -30 °C ... +120 °C / -22 °F ... +248 °F

Materials

- Breather cap made of Steel, zinc/nickel-plated (Fe/Zn Ni 6) and free of hexavalent chromium CrVI (standard option); chrome-plated and epoxy-coated versions available
- Bayonet flange made of Steel, zinc-plated
- Basket made of Steel, zinc-plated
- Seals made of Cork

Contact STAUFF for alternative materials.

Accessories / Options

- Metal basket (800 µm)
- Air filter element

Maximum Air Flow Rate

- 0,40 m³/min / 14.13 cfm

Contact STAUFF for detailed air flow curves.

Installation

- Three-hole bolt pattern for flange interfaces:

- 3 slotted pan head screws (ISO 1580 M5 x 12-5.8) are included in delivery; can be replaced by regular M5 bolts, if required

Without basket **0**

Metal Filler Breather Type SMBT-80 (Threaded Version)

Without Pressurisation

Pressurised

* Please note: The dipstick adaptor is not available for connection threads G1/2 and 1/2 NPT.

Characteristics

Designed to be used as filler ports for hydraulic reservoirs, allowing the reservoir to breathe whilst protecting it from contamination found in harsh environments

Features

- Cap diameter of Ø80 mm / Ø3.15 in
- Threaded version, equipped with male BSP thread (ISO 228) or male NPT thread (ANSI B1.20.1)
- Operating temperature range:
-30 °C ... +120 °C / -22 °F ... +248 °F

Materials

- Breather cap made of Steel, zinc/nickel-plated (Fe/Zn Ni 6) and free of hexavalent chromium CrVI (standard option); chrome-plated and epoxy-coated versions available
- Threaded socket made of Steel, zinc-plated
- Dipstick adaptor made of Polyamide (PA)

Contact STAUFF for alternative materials.

Accessories / Options

- Pressurisation up to 0,7 bar / 10 PSI
- Air filter element
- Dipstick adaptor suitable for plastic dipstick DS-1 (not for connection threads G1/2 and 1/2 NPT)
- Plastic dipstick DS-1 with integrated anti-splash feature (not for connection threads G1/2 and 1/2 NPT)
- Plastic dipstick with integrated magnet
- Oil Demister

Please see pages 26 and 53 for details.

Maximum Air Flow Rate

- 0,45 m³/min / 15.89 cfm

Contact STAUFF for detailed air flow curves.

With dipstick adaptor suitable for dipstick DS-1 (not for connection threads G1/2 and 1/2 NPT)	A
With dipstick adaptor and plastic dipstick DS-1 (300 mm / 11.81 in) with integrated anti-splash feature (not for connection threads G1/2 and 1/2 NPT)	D300
Plastic dipstick (300 mm / 11.81 in) with integrated magnet	D300M

A shorter dipstick length can be achieved by simply cutting down the total length according to individual requirements.

Please note: The dipstick adaptor is required for the subsequent installation of plastic dipsticks DS-1 (see page 26 for details), and is included in delivery when ordering a pressurised version. The dipstick adaptor is not available for connection threads G1/2 and 1/2 NPT.

Dimensional drawings: All dimensions in mm (in).

Metal Filler Breather Type SMBB-80 (Bayonet Version)

B

Characteristics

Designed to be used as filler ports for hydraulic reservoirs, allowing the reservoir to breathe whilst protecting it from contamination found in harsh environments

Features

- Cap diameter of Ø80 mm / Ø3.15 in
- Bayonet version with a six-hole bolt pattern for flange interfaces similar to DIN 24557, part 2
- Operating temperature range: -30 °C ... +120 °C / -22 °F ... +248 °F

Materials

- Breather cap made of Steel, zinc/nickel-plated (Fe/Zn Ni 6) and free of hexavalent chromium CrVI (standard option); chrome-plated and epoxy-coated versions available
- Bayonet flange made of Steel, zinc-plated
- Basket made of Steel, zinc-plated or Polyamide (PA)
- Dipstick adaptor made of Polyamide (PA)
- Seals made of Cork (for filler breathers without pressurisation) or NBR (Buna-N®) (for pressurised filler breathers)

Contact STAUFF for alternative materials.

Accessories / Options

- Metal or plastic basket (800 µm)
- Pressurisation up to 0,7 bar / 10 PSI
- Air filter element
- Locking feature
- Dipstick adaptor (suitable for plastic dipstick DS-1)
- Plastic dipstick with integrated anti-splash feature
- Plastic dipstick with integrated magnet

Please see page 26 for details.

Maximum Air Flow Rate

- 0,45 m³/min / 15.89 cfm

Contact STAUFF for detailed air flow curves.

Installation

- Six-hole bolt pattern for flange interfaces similar to DIN 24557, part 2:

- 6 slotted pan head screws (ISO 1580 M5 x 12-5.8) are included in delivery; can be replaced by regular M5 bolts, if required

Lockable Metal Filler Breather Type SMBL (Clamping, Threaded and Push-On Version)

Clamping Version

Threaded Version

Recommended mounting space: Ø162 mm / Ø6.38 in
2 locking screws M6 x 6 (DIN 916) at positions A and B

Push-On Version

3 locking screws M6 x 6 (DIN 916) at positions A, B and C

Clamping version
with metal basket
(150 mm / 5.91 in)

Characteristics

Designed to be used as lockable filler ports for hydraulic reservoirs, allowing the reservoir to breathe whilst protecting it from contamination found in harsh environments

Features

- Available as clamping version (with 3 clamping jaws), as threaded version (with female BSP thread) or push-on version, suitable for stand pipe mounting with pipe diameters up to 77.5 mm / 3.05 in (secured by 3 locking screws)
- Key-lockable cap (2 keys included)
- Lock protected by rotating flap
- Operating temperature range: -30 °C ... +100 °C / -22 °F ... +212 °F
- Air flow in both directions, one direction only or no direction

Materials

- Breather cap made of Aluminium, lacquered (light-grey, RAL 9022)
- Breather body made of Aluminium and steel zinc-plated
- Basket made of Steel, zinc-plated or Polypropylene (PP)
- Seals made of NBR (Buna-N®) (standard option); FKM (Viton®) sealed version available

Contact STAUFF for alternative materials.

Accessories / Options

- Metal or plastic basket (800 µm; telescopic)
- Air filter element

FKM (Viton®) **V**

⑦ Cap Design

Breather cap made of Aluminium, lacquered (light-grey, RAL 9022) **0**

Side Mount Bracket Type ASMB-1 (Polyamide Version)

Characteristics

Lateral fastening of filler breathers with a six-hole flange connection similar to DIN 24557, part 2 to vertical or sloped walls of hydraulic reservoirs; ideal for applications in which space is limited

Suitability

- Suitable for Plastic Filler Breathers SPB-5 and SPBN (bayonet version) and Metal Filler Breathers SMBB-80

Materials

- Mounting bracket made of Polyamide (PA)
- Seal plate made of Klingerit
- Screws and hex nuts made of Steel, zinc-plated
- Washers made of Steel, zinc-plated
- Plastic spacers made of Polyamide (PA)

Scope of Delivery

- 1 mounting bracket
- 1 seal plate
- 7 socket cap screws M6 x 25 (ISO 4762)
- 7 plastic spacers 6,4 (DIN 125)
- 7 hex nuts M6 (ISO 4032)
- 7 washers 6,4 (DIN 9021)
- 6 sheet metal screws 4,8x13 (ISO 7049)

Installation

- Bolted to the side of the reservoir
- Bayonet flange of filler breather is placed on top
- Flange interface similar to DIN 24557, part 2 with 6 equally spaced mounting bores Ø4,5 mm / Ø.18 in (BCD Ø71±0,2 mm / Ø2.80±.01 in)

Side Mount Bracket Type ASMB-2 (Aluminium Version)

Characteristics

Lateral fastening of filler breathers with a six-hole flange connection similar to DIN 24557, part 2 to vertical or sloped walls of hydraulic reservoirs; ideal for applications in which space is limited

Suitability

- Suitable for Plastic Filler Breathers SPB-5 and SPBN (bayonet version) and Metal Filler Breathers SMBB-80

Materials

- Mounting bracket made of Aluminium
- Seal plate made of NBR (Buna-N®)
- Screws made of Steel, phosphated
- Washers made of gasket paper

Scope of Delivery

- 1 mounting bracket
- 1 seal plate
- 6 socket cap screws M6 x 20 (ISO 4762)
- 6 plastic spacers 6,4 (DIN 125)

Installation

- Bolted to the side of the reservoir
- Bayonet flange of filler breather is placed on top
- Flange interface similar to DIN 24557, part 2 with 6 equally spaced bores M5 (BCD Ø73±0,2 mm / Ø2.87±.01 in)

Total height of 39 mm (1.56 in) **1**
Total height of 69 mm (2.72 in) **2**

③ Anti-Splash Feature

Without anti-splash feature (standard option) **-**
With anti-splash feature **A**

Installation

- Six-hole bolt pattern for flange interfaces similar to DIN 24557, part 2:

- Supplied without gaskets and bolts

Characteristics

Designed to raise filler breathers either 24 mm / .94 in or 54 mm / 2.12 in above the actual mounting surface of the reservoir to prevent contamination from blocking the filter element

Suitability

- Suitable for Metal Filler Breathers SMBB-80 and Plastic Filler Breathers SPBN (bayonet version)
- Replaces the existing bayonet flanges of these breathers

Materials

- Bayonet flange made of Steel, zinc-plated

Weld Riser Type WR

Order Codes

WR - 1

① ②

① Type

Weld Riser **WR**

② Size

Total height of 25,4 mm (1.00 in) **1**

Materials

- Weld riser made of Steel, untreated

Installation

- Welded to the top of the reservoir
- No requirement to drill and tap on the reservoir
- Bayonet flange of filler breather is placed on top

Characteristics

Designed to raise filler breathers 25,4 mm / 1.00 in above the actual mounting surface of the reservoir to prevent contamination from blocking the filter element whilst eliminating the requirement to drill and tap on the reservoir

Suitability

- Suitable for Metal Filler Breathers SMBB-80 as well as Plastic Filler Breathers SPB-5 and SPBN (bayonet version) and all components with a six-hole flange connection similar to DIN 24557, part 2

Please note: The information on the selection and sizing of desiccant breathers in this catalogue is intended only as general non-binding guidelines. In addition to the maximum air flow rate and the frequency of breathing, the Type and volume of the reservoir, the medium used and its chemical compatibility as well as specific environmental conditions (e.g. contamination, ambient temperature and especially temperature changes, humidity) can also play a decisive role. Typically, large volume systems and applications with particularly challenging environmental conditions require the most careful analysis. Please contact STAUFF for assistance in the selection and sizing of desiccant Breathers.

Particle and Desiccant Breather (Robust Design) Type SDB

Characteristics

Function

When a reservoir or gearbox breathes, air containing moisture is ingested into the system. Temperature fluctuations will cause this moisture to condense which can speed up the oxidation of the fluid and lead to damage in the system.

Using SDB series Particle and Desiccant Breathers, the incoming air first passes through a coarse filter, then a drying agent and finally an Air Breather element to filter out any dirt particles in addition to the moisture.

Description

The SDB series from STAUFF is robust design that is used in particularly demanding areas in mobile hydraulics (e.g. in the construction, mining and demolition industries).

Available in four different housing lengths between 160 mm and 355 mm (without thread) and has a diameter of 98 mm or 130 mm depending on the selected length.

The UV-resistant plastic housing is designed with an internal stainless steel tube for maximum stability. The Particle and Desiccant Breather can be installed on the system via the external thread at the lower end of the stainless steel tube.

Features

- Available in 4 different sizes
- Diameter of 98 mm or 130 mm
- Internal stainless steel tube for maximum stability
- Connection via BSP or NPT male thread on the stainless steel tube
- Available with optional, integrated check valves (Type SDB-CV)
- Replaceable Drying Agent
- Replaceable Air Breather Element (Type SGB)
- Micron rating of the Air Breather Element: 3 µm
- Refill and Maintenance Kits available
- Extensive range of accessories
- Operating temperature range:
-40°C ... +90 °C / -40 °F ... +194 °F

The optional spring-loaded check valves integrated in the housing isolate the dryer material outside the from the atmosphere and optimise the service life.

A change in the color of the desiccant material indicates that it needs to be replaced (from red to orange in the standard version). Saturated Drying Agent, as well as the screw-on spin-on element, can be easily replaced by the user if necessary. Corresponding refill and maintenance kits are available from STAUFF.

Particle and Desiccant Breather (Compact Design) Type SDBL

Characteristics

Function

When a reservoir or gearbox breathes, air containing moisture is ingested into the system. Temperature fluctuations will cause this moisture to condense which can speed up the oxidation of the fluid and lead to damage in the system.

Using SDBL series Particle and Desiccant Breathers, the incoming air first passes through a coarse filter, then a dryer agent material and finally an Air Breather element to filter out any dirt particles in addition to the moisture.

Description

The SDBL series from STAUFF is a compact and flexible design that are used, for example, in power pack and reservoir manufacturing.

Available in five different housing lengths between 117,5 mm and 322,5 mm and have a diameter of 70 mm, 99 mm or 129 mm depending on the selected length.

The UV-resistant one piece plastic housing is designed with a female BSP thread on the bottom. The Particle and Desiccant Breather can be installed with an adaptor.

Features

- Available in 5 different sizes
- Diameter of 70 mm, 99 mm or 129 mm
- One piece plastic housing
- BSP Female connection thread on plastic housing
- Available with optional, integrated check valves (Type SDBL-CV)
- Replaceable Drying Agent
- Replaceable Air Breather Element under the plastic cap, Micron rating of the Air Breather Element: 3 µm
- Refill and Maintenance Kits available
- Extensive range of accessories
- Operating temperature range:
-40°C ... +90 °C / -40 °F ... +194 °F

The optional spring-loaded check valves integrated in the housing isolate the dryer material outside the from the atmosphere and optimising the service life.

A change in the color of the desiccant material indicates that it needs to be replaced (from red to orange in the standard version). Saturated dryer agent material, as well as the Air Breather element, which is placed under the plastic cap, can be easily replaced by the user if necessary. Corresponding refill and maintenance kits are available from STAUFF.

Desiccant Breather (Simplified Design) Type SVDB

Characteristics

Function

When a reservoir or gearbox breathes, air containing moisture is ingested into the system. Temperature fluctuations will cause this moisture to condense which can speed up the oxidation of the fluid and lead to damage in the system.

Using SVDB series Desiccant Breathers, the incoming air first passes through a coarse filter, then a Drying Agent and finally an PU washer to filter out rough dirt particles.

Description

The SVDB series from STAUFF is a simplified design for less demanding applications. In contrast to the SDB and SDBL series, Desiccant Breathers of the SVDB series must be replaced when the service life of the Complete Unit is reached.

Available in five different housing lengths between 96,5 mm and 286,5 mm and have a diameter of 63 mm, 91 mm or 121 mm depending on the selected length.

Features

- Available in 5 different sizes
- Diameter of 63 mm, 91 mm or 121 mm
- Drying Agent und Air Breather Element is not replaceable
- One piece plastic housing
- BSP Female connection thread on plastic housing
- Filter Fineness of the PUR filter disc: 100 µm
- Operating temperature range:
-40°C ... +90 °C / -40 °F ... +194 °F

The UV-resistant one piece plastic housing is designed with a female BSP thread on the bottom. The Particle and Desiccant Breather can be installed with a adaptor.

A change in the color of the desiccant material indicates that it needs to be replaced (from red to orange in the standard version). Saturated Drying Agent is not replaceable, so that the entire unit is disposed of when it reaches the end of its service life.

Valve Unit Type PSU-P-TF

Characteristics

Valve Units type PSU-P-TF increase the service life and reduce maintenance intervals of particle and desiccant breathers and tank filler breathers due to less air movement

Features

- Thread: G3/4 BSP Female (ISO 228)
- Reservoir Pressurisation with 0.35 bar / 5 PSI (no air is expelled from the reservoir until the pressurisation level is reached)
- Intended for Particle and Desiccant Breather series SDB, with adaptor also suitable with series SDBL and SVDB and also with breathers SPB and SMBT.

Materials

- Adaptor made of Aluminum
- Valves made of plastic
- Seals made of NBR (Buna-N®)
- Operating temperature range: -40 °C ... +120 °C / -40 °F ... +248 °F

Order Code

Order Code

TBA-090-B12F-B12F-B0.35

Dimensional drawings: All dimensions in mm (in).

Characteristics

Valve Units type PSU-P allows the maintaining of the Reservoir Pressurisation from 0.35 bar / 5 PSI.

Attached to the internal thread of the Desiccant Breather housing (only for type SDBL/SVDB-121 and SDBL/SVDB -122) and designed in such a way that the overall length of the Desiccant Breather is only slightly increased. Due to its installation in the housing, the valve unit cannot be combined with the oil demister insert of type PSU-OD.

Features

- Thread: G1-1/4 BSP Male (ISO 228)
- Reservoir Pressurisation with 0.35 bar / 5 PSI (no air is expelled from the reservoir until the pressurisation level is reached)
- Opening Pressure: 0.02 bar / .29 PSI (Air flow into the Tank)

Materials

- Adaptor made of steel, zinc-plated
- Valves made of plastic
- Seals made of NBR (Buna-N®)
- Operating temperature range: -40 °C ... +120 °C / -40 °F ... +248 °F

Order Code

Order Code

TBA-SDBL-120-B20-B0.35-P

Dimensional drawings: All dimensions in mm (in).

Valve Unit Type PSU-QE

Characteristics

Valve Units type PSU-QE are used to discharge outflowing air (with the 6 valves on the hexagon) past the Drying Agent to extend the service life.

Attached to the internal thread of the Desiccant Breather housing (only for type SDBL/SVDB-121 and SDBL/SVDB -122) and designed in such a way that the overall length of the Desiccant Breather is only slightly increased. Due to installation in the housing, the valve unit cannot be combined with the oil demister insert of type PSU-OD.

Features

- Thread: G1-1/4 BSP Male (ISO 228)
- Opening Pressure of the Check Valves: 0.02 bar / .29 PSI (Air flow into and out the Tank)
- Check Valve with 0.35 bar / 5 PSI

Materials

- Adaptor made of steel, zinc-plated
- Valves made of plastic
- Seals made of NBR (Buna-N®)
- Operating temperature range: -40 °C ... +120 °C / -40 °F ... +248 °F

Order Code

Order Code

TBA-SDBL-120-B20-B0.35-QE

Dimensional drawings: All dimensions in mm (in).

Adaptor Plate Type AP

Particle and Desiccant
Breather SDB
with Adaptor Plate AP

Dimensional drawings: All dimensions in mm (in).

Characteristics

Designed to simplify the installation of Desiccant Breathers and enable the use of a visual contamination indicator.

With Adaptor Plates AP, desiccant air breathers can be directly mounted to existing connections with a six-hole bolt pattern for flange interfaces similar to DIN 24557, part 2.

They are also equipped with a female G1/8 BSP thread (ISO 228) to connect with the Visual Contamination Indicator FM/FME.

Adaptor Plates AP are made of Polyamide (PA). A blind plug, O-ring made of NBR (Buna-N®) and 6 socket cap screws (ISO 4762) are supplied with AP as a standard.

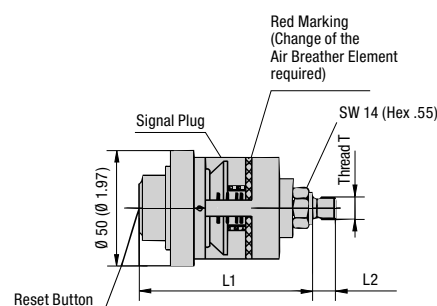

Contact STAUFF for other Adaptor Plates.

Contamination Indicators Type FM/FME

Particle and Desiccant
Breather SDB
with Adaptor Plate AP
and Visual Contamination
Indicator FM or Visual-
Electrical Contamination
Indicator FME

Dimensional drawings: All dimensions in mm (in).

Characteristics

Designed to indicate the status of Air Breather Elements.

Filter Minder Contamination Indicators are connected to the female G1/8 BSP thread (ISO 228) of the Adaptor Plate AP and give a indication of the contamination level of the Air Breather Element. A red marking indicates when the Air Breather Element has to be replaced.

Visual Contamination Indicators FM can be reset after each use.

Material

- Housing made of Polycarbonate

Technical Data

- Operating temperature range: -40 °C ... +121 °C (-40 °F ... +250 °F)
- Accuracy: $\pm 10\%$ (red marking)
- Electrical Connection (FME): Metri-Pack 150 plug
- Switching function type FME: n/o

Order Codes and Dimensions

Thread T	Dimensions (mm/in)		Order Code
L1	L2

	2.54	.39	
G1/8 BSP Male (ISO 228)	88	10	FME
	3.46	.39	

Order Codes und Dimensions

Dimensions (mm/in)		Order Code
Length	Diameter	
140	60	TBA-090-B-OD-140
5.51	2.36	
210	60	TBA-090-B-OD-210
8.27	2.36	

Dimensional drawings: All dimensions in mm (in).

Characteristics

Designed to prevent oil mist from leaving the hydraulic reservoir through Desiccant Breathers and other breathers

Features

- Available in 2 different sizes with lengths of 140mm / 5.51in or 210mm / 8.27in
- Intended for Particle and Desiccant Breather series SDB, with adaptor also suitable with series SDBL and SVDB

Materials

- Housing with cooling ribs made of Aluminum housing with cooling ribs
- Threaded adaptors made of Steel

Oil Demister Type TBA-...-OD

Breather Port:
Female G3/4 BSP
(ISO 228)

Reservoir Port:
Male G3/4 BSP
(ISO 228)

Order Codes

for use with...	Order Code
SDBL/SVDB-093/096	PSU-OD-090
SDBL/SVDB-121/122	PSU-OD-120

Characteristics

The Oil Demister Insert reduces oil mist from leaving the hydraulic reservoir and is placed inside the Desiccant Breather housing so that the overall length of the Desiccant Breather is not increased. The use of an adaptor is recommended. Due to its placement in the internal thread of the housing, the oil demister insert cannot be combined with valve units of types PSU-P and PSU-QE.

Features

- Available in 2 different sizes
- Intended for series SDBL and SVDB (only Size 090/120)

Material

- Stainless Steel

Oil Demister Insert Type PSU-OD

Order Codes

for use with...	Order Code
SDB-121/122 with SDBL-121/122	RING-SDB-120-PSU-HC

Characteristics

Creates a safe seal when using the stacking feature of the Particle and Desiccant Breathers

- Adaptor Ring for Stacking Assembly version SDB+SDBL
- Doubling of the water absorption capacity and Maintenance intervals
- Permanent or temporary mounting (alternative for mounting an additional Particle and Desiccant Breather)
- Type SDB is the basis to ensure the necessary stability (Maximum 2 levels possible)
- Under certain circumstances, additional attachment of the upper level to the SDBL is recommended

Adaptor Ring for Stacking Assembly Type PSU-HC

Assembled

Order Codes

for use with...	Order Code
SDB-093/096	KIT-SDB-090-MAINTAIN
SDB-121/122	KIT-SDB-120-MAINTAIN

SDBL-093/096	KIT-SDBL-090-MAINTAIN
SDBL-121/122	KIT-SDBL-120-MAINTAIN

Characteristics

Saturated Drying Agent and the Air Breather Element can be easilie replaced by the user with the Refill and Maintenance Kit.

Scope of delivery

- Drying Agent Refill
- Air Breather Element
- PUR Filter discs
- Sealing (only for KIT-SDB-...)
- Thread plugs
- Seal sticker

Individual spare parts are also available separately on request. Please contact STAUFF for further information.

Refill and Maintenance Kits Type KIT-...-MAINTAIN

KIT-SDB-...-MAINTAIN

KIT-SDBL-...-MAINTAIN

Particle Breather (Air Breather Element) Type SGB

Characteristics

Replaceable Air Breather Elements for STAUFF Particle and Desiccant Breathers.

They can also be used with an Adaptor as separate air filters for hydraulic reservoirs.

Characteristics

- Diameter of 68 mm / 2.68 in (SGB-060), 100 mm / 3.94 in (SGB-090) or 130 mm / 5.12 in (SGB-120)
- Equipped with female BSP thread (ISO 228)
- Including sealing made of NBR (Buna-N®)
- Operating temperature range: -32 °C ... +100 °C / -25 °F ... +212 °F

Accessories / Options

- Adaptors (for direct installation on top of hydraulic reservoirs)

Please see page 50 for a selection of adaptors available.

Air Flow

- Maximum air flow rates:
0,05 m³/min / 1.77 cfm for SGB-060
0,70 m³/min / 24.71 cfm for SGB-090
1,50 m³/min / 52.97 cfm for SGB-120

Dimensions and Filter Specifications

Type	Thread T*	Dimensions (mm/in)		Filter Material	Micron Rating	Max. Air Flow Rate

Suction Strainers

48 - 51

SUS (Polyamide End Cap)

50

SUS (Aluminium End Cap)

51

Suction Strainer (Polyamide End Cap) Type SUS

Flow Characteristics

Nominal Flow Rate vs. Pressure Drop ΔP

The following characteristics are valid for Mineral oils with a mass density of 0,85 kg/dm³ and a kinematic viscosity of 30 mm²/s (cSt) at +38 °C / +100 °F.

Characteristics

Designed as in-tank suction strainer elements for direct installation into suction lines of pumps; should always be installed below the minimum fluid level of the reservoir

Features

- Available with female BSP thread (ISO 228) or female NPT thread (ANSI B1.20.1)
- Operating temperature range: -20 °C ... +100 °C / -4 °F ... +212 °F

Media Compatibility

- Suitable for use with Mineral and Petroleum based hydraulic fluids (HL and HLP)

Materials

- Threaded end cap made of glass-fibre reinforced Polyamide (PA); see page 59 for version with Aluminium end cap
- Lower end cap and support tube made of Steel, zinc-plated
- Standard filter material is Stainless Steel Mesh (125 µm); alternative micron ratings of 60 µm and 250 µm on request

Options

- Integrated bypass valve with an opening pressure of 0,2 bar (3 PSI) to reduce the risks of high-pressure drops that can be caused by contaminated strainer elements or high-viscosity fluids

Special sizes, designs, materials and configurations are available on request. Contact STAUFF for details.

Contact STAUFF for alternative materials.

Suction Strainer (Aluminium End Cap) Type SUS

Flow Characteristics

Nominal Flow Rate vs. Pressure Drop

The following characteristics are valid for Mineral oils with a mass density of 0.85 kg/dm³ and a kinematic viscosity of 30 mm²/s (cSt) at +38 °C / +100 °F.

Characteristics

Designed as in-tank suction strainer elements for direct installation into suction lines of pumps; should always be installed below the minimum fluid level of the reservoir

Features

- Available with female NPT thread (ANSI B1.20.1)
- Operating temperature range:
-20 °C ... +100 °C / -4 °F ... +212 °F

Media Compatibility

- Suitable for use with Mineral and Petroleum based hydraulic fluids (HL and HLP)

Materials

- Threaded end cap made of Aluminium; see page 58 for version with Polyamide (PA) end cap
- Lower end cap and support tube made of Steel, zinc-plated
- Filter material made of Stainless Steel Mesh (125 µm); alternative micron ratings of 60 µm and 250 µm on request

Contact STAUFF for alternative materials.

Options

- Integrated bypass valve with an opening pressure of 0,2 bar (3 PSI) to reduce the risks of high-pressure drops that can be caused by contaminated strainer elements or high-viscosity fluids

Special sizes, designs, materials and configurations are available on request. Contact STAUFF for details.

SRV (Female BSP Threaded Version)

54

SRV (Female NPT Threaded Version)

55

Diffuser Type SRV (Female BSP Threaded Version)

Installation

Installation below the minimum fluid level of the reservoir with the plain area facing the pump inlet

Characteristics

Designed for direct installation into return lines to reduce fluid aeration, foaming and noise; should always be installed below the minimum fluid level

Features

- Available with female BSP thread (ISO 228)
- Operating temperature range:
-20 °C ... +100 °C / -4 °F ... +212 °F
- Max. working pressure: 20 bar / 290 PSI

Media Compatibility

- Suitable for use with Mineral and Petroleum based hydraulic fluids (HL and HLP)

Construction and Materials

- 2 concentric tubes with inner spaced holes
- Threaded end cap made of Aluminium
- Other components made of Steel, zinc-plated

Special sizes, designs, materials and configurations are available on request. Contact STAUFF for details.

Characteristics

Designed for direct installation into return lines to reduce fluid aeration, foaming and noise; should always be installed below the minimum fluid level

Features

- Available with female NPT thread (ANSI B1.20.1)
- Operating temperature range: -20 °C ... +100 °C / -4 °F ... +212 °F
- Max. working pressure: 20 bar / 290 PSI

Media Compatibility

- Suitable for use with Mineral and Petroleum based hydraulic fluids (HL and HLP)

Construction and Materials

- 2 concentric tubes with inner spaced holes
- Threaded end cap made of Aluminium
- Other components made of Steel, zinc-plated

Special sizes, designs, materials and configurations are available on request. Contact STAUFF for details.

Order Codes

SRV - 050 - N12

①

②

③

① Type

Diffuser **SRV**

② Max. Flow Rate

50 l/min / 13 US GPM	050
114 l/min / 30 US GPM	114
200 l/min / 52 US GPM	200
227 l/min / 59 US GPM	227
454 l/min / 118 US GPM	454
650 l/min / 169 US GPM	650
950 l/min / 247 US GPM	950

③ Connection Thread (Female)

3/4 NPT	N12
1 NPT	N16
1-1/4 NPT	N20
1-1/2 NPT	N24
2 NPT	N32
2-1/2 NPT	N40
3 NPT	N48

Contact STAUFF for alternative threads.

Diffusers SRV are ideally suited for use with STAUFF Return Line Filters of the RF series with threaded connection.

For details, please see Catalogue 9 -STAUFF Filtration Technology.
